2. Information about GreenWay

GreenWay Polska Spółka z o.o., ul. Łużycka 3c, 80-537 Gdynia, Poland

Tax Identification Number (NIP): 5833195289; National Business Registry Number (REGON): 363635970; National Court Register (KRS): 0000602098; BDO Register No.: 000423278

Email: office@greenwaypolska.pl; Tel.: +48 58 325 10 77

GreenWay Polska Sp. z o.o. (hereinafter referred to as "GreenWay", "GW", or the "Contracting Authority") operates a network of over 2,000 electric vehicle charging stations in Poland. GW acts as both a Charging Point Operator (CPO) and an E-Mobility Service Provider (EMP).

GreenWay is currently implementing a project in Poland co-financed by the National Fund for Environmental Protection and Water Management (NFOŚiGW) under the program "Support for infrastructure for charging electric vehicles and hydrogen refuelling infrastructure." The objective of GW is to deploy approximately 500 additional fast chargers with an installed capacity of at least 150 kW over the next 2 to 3 years. This project will establish a network of publicly accessible fast-charging points.

Further information about GreenWay and its services can be found at:

www.greenwaypolska.pl

3. General Information Regarding RFQ

The Contracting Authority intends to select a single supplier of Chargers with a power output of up to 149 kW, with whom the Contracting Authority will conclude a contract in accordance with the template attached as Appendix No. 3 to this Request for Quotation.

Under the contract, the Contracting Authority plans to order 90 charging units. However, the Contracting Authority reserves the right to reduce this number depending on the progress of construction works at the charging station sites, provided that the number shall not fall below 20 units.

This procedure is not conducted pursuant to the Public Procurement Law of 11 September 2019.

The Contracting Authority does not foresee reimbursement of costs related to participation in the procedure.

The Contracting Authority does not allow the submission of variant offers.

The Contracting Authority does not allow the submission of partial offers.

The Contracting Authority does not permit the submission of a single offers by multiple entities forming a consortium or any other agreement for the purpose of performing the contract (hereinafter: "consortium").

Each tenderer may submit only one offer.

This Request for Quotation may be amended prior to the expiry of the deadline for submission of offers specified herein. In such a case, the information about the amendment shall be published in the same manner as the original Request for Quotation, including a revised deadline for submission of tenders, if necessary due to the scope of changes introduced.

A tenderer may request the Contracting Authority to clarify the content of the Request for Quotation or any appendices thereto. The Contracting Authority shall provide clarification if the request is received no later than 3 business days (business days being Monday 8:00 AM to Friday 3:30 PM, excluding public holidays) prior to the deadline for submission of tenders. The questions and responses from the Contracting Authority shall be published in the same manner as the Request for Quotation.

4. Conditions for Participation in the RFQ

The procedure is open to Contractors who:

- are not subject to exclusion and submit a declaration in the form specified in Appendix No. 4, confirming the absence of grounds for exclusion;
- provide a document, valid as of the offer submission date, confirming registration in the relevant business register authorizing the performance of commercial activity (from the National Court Register or other register, including the Central Registration and Information on Business CEIDG). If the tenderer has its registered office outside the Republic of Poland, it must submit a document confirming entry in the appropriate commercial register maintained in the country of its registered office;
- submit a declaration, in the form specified in Appendix No. 5, confirming compliance with the participation criteria;
- In the most recently completed financial year, they achieved revenue in the amount of EUR 2,500,000.00;
- document, by means of confirmed delivery notes, the sale of at least 200 units of the offered charger model within the European Union in the years 2022–2024.

5. Description of the Subject of the Contract

The subject of the contract is the supply of up to 90 units of direct current (DC) fast chargers (not fewer than 20 units), each with a up to power output of 149 kW.

CPV Code Name: Chargers; CPV Code: 31158000-8.

As part of the performance of the contract, the Contractor shall in particular be obliged to:

- transfer ownership of the charging stations to the Contracting Authority;
- deliver the charging stations;

- provide all technical documentation related to each electric vehicle charging station;
- provide a 60-month warranty;
- carry out warranty and maintenance repairs of the charging stations within the following timeframes:
 - for defects that completely prevent the device from functioning: as soon as reasonably possible, but no later than 5 business days from the day following the defect notification date;
 - for defects that reduce the device's parameters or do not degrade them: within 6 and 7 business days, respectively;
- deliver the equipment in accordance with the terms set out in the contract template (Appendix No. 1);
- ensure the availability of spare parts for the Chargers for a period of ten years from the delivery date of each Charger;
- maintain up-to-date and error-free firmware for the Chargers for ten years from the delivery date of the last Charger delivered under the Agreement;
- grant a license for the Charger firmware for the entire operational period of the Chargers, not shorter than twelve years.

The DC fast chargers must meet, in particular, the mandatory minimum technical requirements and other specifications described in Appendix No. 1, which must be included in the offered product price.

The chargers must comply with the regulation on technical requirements for charging stations and charging points that form part of the public road transport infrastructure, issued by the Ministry of Energy on 15 July 2019.

The chargers must in particular meet the following essential requirements:

- be equipped with a power management system that distributes power between active connectors;
- be equipped with a Payter Apollo payment terminal capable of processing payments via Elavon Inc.;
- be equipped with an automatic cable management system (CMS) to facilitate cable handling.
- the capacitive reactive power generated must not exceed 3% of the active power consumed by the charging station.

A detailed description of the subject of the contract is provided in Appendix No. 1 to this Request for Quotation, as well as in the contract template constituting Appendix No. 3.

The Contracting Authority allows for solutions equivalent to those described in this Request for Quotation by means of standards, technical approvals, technical specifications, and technical reference systems.

In all provisions of the Request for Quotation and its appendices where, due to the inability to describe the subject of the contract with sufficient precision and clarity, the Contracting Authority refers to standards, technical approvals, technical specifications or reference systems, or indicates trademarks, patents, sources of origin, or specific processes characteristic of products or services supplied by a particular contractor, equivalent solutions to those described are permitted. If specific manufacturer product names are indicated in the description of the subject of the contract, they should be treated solely as an indication of the desired standard and quality. In all such cases, the Contractor may offer equivalent materials or products with at least the same technical and quality parameters. The term "equivalent product" shall mean a product whose technical parameters, performance, durability and quality are not inferior to those of the products described in Appendix No. 1.

In relation to the payment terminal, which must conform to the model described in Appendix No. 1 to this Request for Quotation, the Contracting Authority requires compliance with the specific requirements set out herein and in the relevant appendices.

With regard to the license for Charger software, the Contracting Authority allows the use of the Contractor's standard license agreement templates.

6. Information on Evidence Relating to the Subject of the Contract

To confirm that the offered supplies (offered Products) meet the requirements, characteristics or criteria specified by the Contracting Authority (particularly those set out in Appendix No. 1 to the Request for Quotation), the Contracting Authority requires the following evidence to be submitted together with the offer:

- a technical-operational description of the charging station, including drawings and diagrams;
- a declaration from the Contractor regarding the charger's compliance with the Contracting Authority's requirements — confirming that the charger meets the technical requirements indicated in the Request for Quotation, in particular those set out in Appendix No. 1;
- an opinion issued by the Office of Technical Inspection (UDT) concerning the documentation related to the offered charger model.

If the Contractor fails to submit the required evidence or submits incomplete documentation, the Contracting Authority shall request that such evidence be submitted or supplemented within the deadline set by the Contracting Authority. This provision shall not apply where the evidence is intended to confirm compliance with criteria used for the

evaluation of tenders, or where — despite submission — the offer is subject to rejection or where there are grounds to cancel the procedure.

The Contracting Authority may request clarification from Contractors regarding the content of the submitted evidence.

The Contracting Authority may accept alternative relevant evidence, other than those listed in items 1–3 above, in particular the manufacturer's technical documentation, if the given Contractor does not have access to the relevant certificates or is unable to obtain them within the appropriate timeframe, provided that this lack of access is not attributable to the Contractor and that the Contractor proves that its supplies or services meet the requirements, characteristics or criteria specified in the description of the subject of the contract, the evaluation criteria or the conditions for contract performance.

7. Price Offers

Price offers must be submitted in EURO currency, using the format specified in Appendix No. 2. The offered price must include all costs related to the performance of the subject of the contract and cover all obligations arising from the information presented in Appendices No. 1, 4 and 5.

The offered price per charger shall include:

- the cost of delivery to the Contracting Authority's warehouse located in Gdynia or Gdańsk,
- a standard five-year warranty,
- the cost of warranty servicing of the charging station, including on-site repair in case of failure, within the time limits specified in section 5.5.

If the offered price or cost appears to be abnormally low in relation to the subject of the contract — i.e., it differs by more than 30% from the arithmetic mean of all valid, non-rejected offers — or raises doubts on the part of the Contracting Authority as to the feasibility of performing the contract in accordance with the requirements specified in the Request for Quotation or arising from applicable laws, the Contracting Authority shall request the Contractor to provide explanations within the indicated timeframe, including evidence concerning the calculation of the price or cost. The Contracting Authority shall assess such explanations in consultation with the Contractor and may reject the offer only if the explanations and evidence submitted do not justify the proposed price or cost.

8. Grounds for Exclusion and Cancellation of the Procedure

The Contracting Authority shall exclude a Contractor from the procedure if:

- there is a conflict of interest, particularly where the Contractor is personally or financially connected with the Contracting Authority, as defined below.

Personal or financial connections shall be understood as mutual relationships between the Contracting Authority or persons authorized to incur obligations on behalf of the Contracting Authority, or persons performing actions related to the selection procedure on behalf of the Contracting Authority, and the Contractor, including in particular:

- participation in a company as a partner in a civil law partnership or a partnership;
- ownership of at least 10% of shares or stock (unless a lower threshold is stipulated by law);
- holding the position of a member of the supervisory or management body, a proxy, or an attorney-in-fact;
- being married to, directly related by blood or affinity, or related by blood or affinity up to the second degree in the collateral line, or having an adoption, custody, or guardianship relationship with the Contracting Authority, its legal substitute, or members of its management or supervisory bodies;
- being in a legal or factual relationship with the Contracting Authority which raises justified doubts as to their impartiality or independence in connection with the contract award procedure.

- the Contractor, as a result of intentional action or gross negligence, misled the Contracting Authority in providing information regarding non-exclusion or fulfilment of participation requirements, which could have had a material impact on the decisions taken by the Contracting Authority in the contract award procedure, or concealed such information or is unable to provide the required evidence of eligibility;
- the Contractor seriously violated professional or contractual obligations in a culpable manner, which undermines its integrity — particularly if, as a result of intentional act, omission or gross negligence, the Contractor failed to perform or improperly performed a contract, and the Contracting Authority can substantiate this with relevant evidence;
- the Contractor unlawfully influenced or attempted to influence the actions of the Contracting Authority, or sought to obtain or obtained confidential information that could provide an advantage in the procurement procedure;
- the Contractor is subject to circumstances referred to in Article 7(1) of the Act of 13 April 2022 on special solutions for counteracting the support of aggression against Ukraine and for the protection of national security (Journal of Laws of 2022, item 835).

The Contracting Authority shall reject an offer if:

- it was submitted contrary to the procedure defined by the Contracting Authority;
- its content does not comply with the requirements specified in the Request for Quotation, contract template, or other procurement documents;

- its submission constitutes an act of unfair competition within the meaning of the provisions on combating unfair competition.

The Contracting Authority reserves the right to cancel the procedure or request additional information/requirements (including technical), or to change the required structure and scope of the Request for Quotation.

The Contracting Authority shall cancel the procurement procedure if:

- no offers have been submitted;
- all offers have been rejected;
- all Contractors have been excluded from the procedure;
- the price or cost of the most advantageous offer or the lowest offer exceeds the amount the Contracting Authority intends to allocate to finance the contract, unless the Contracting Authority is able to increase that amount up to the price or cost of the most advantageous offer.

9. Essential Terms of the Contract, Grounds for Contract Amendments

The contract template constitutes Appendix No. 3 to this Request for Quotation.

The Contracting Authority foresees the possibility of making substantial amendments to the provisions of the concluded contract if at least one of the circumstances specified in the contract template (Appendix No. 3 to this Request for Quotation) occurs.

10. Submission of Offers, Binding Period

Offers shall be submitted in electronic form, in a .pdf file format secured against modification, by **30 April 2025**, via email to: pawel.sierko@greenwaypolska.pl, with a copy to: blazej.siuchninski@greenwaypolska.pl.

The offer submission period begins on the day following the publication of the Request for Quotation and ends at the close of the last day of the submission period.

Each offer must include:

- completed and signed Appendices No. 1, 2, and 4–6, signed by persons authorized to submit tenders and make declarations on behalf of the Contractor;
- an excerpt, transcript, or other document confirming entry in the relevant business register authorizing the performance of economic activity (from the National Court Register or other register, including the Central Registration and Information on Business CEIDG). If the tenderer has its registered office outside the Republic of Poland, the tenderer shall submit a document confirming registration in the appropriate commercial register in the country where it is established.

Additionally, the potential supplier must submit:

- The approved financial statement for the most recently completed financial year confirming the achievement of an annual revenue of at least EUR 2,500,000, or another document with an equivalent function in the case of a Contractor established abroad.
- delivery documentation confirming the sale of at least 200 units of the offered charger model within the European Union in the years 2022–2024;
- a technical-operational description of the charging station including drawings and diagrams;
- a declaration by the Contractor confirming that the offered charger complies with the Contracting Authority's requirements — specifically those set out in Appendix No. 1 to this Request for Quotation;
- an opinion issued by the Office of Technical Inspection (UDT) concerning the documentation for the offered charger model.

Offers submitted after the deadline shall be rejected. The date and time of receipt by the Contracting Authority shall determine compliance with the deadline.

The offer may be prepared in either Polish or English, while the price must be expressed in EUR.

The tenderer shall bear all costs associated with the preparation and submission of the offer.

The Contractor shall be bound by its offer until **31 May 2025**.

If the selection of the most advantageous offer does not occur before the expiry of the binding period, the Contracting Authority may, prior to the expiry of that period, request the Contractors once to agree to extend the binding period by the duration indicated, not exceeding 30 days.

Extending the binding period requires the Contractor to submit a declaration of consent to such an extension.

11. Criteria and Method for Evaluation of Offers

The evaluation criteria, their weights, and the method for calculating the point value for each criterion are as follows:

Net Price (excluding VAT)

Weight: 50%

Point score:

Price Score = (Minimum Price / Offered Price) × 100 points × Weight, where:

- **Minimum Price** – the lowest price among all valid, non-rejected offers,

- **Offered Price** – the price proposed by the tenderer.

Power Output of the Offered Charging Station

Weight: 30%

Point score:

- 30 points – if the power output is between 141 and 149 kW,
- 15 points – if the power output is between 131 and 140 kW,
- 5 points – if the power output is between 100 and 130 kW.

Delivery Time

Declaration of delivery time for the first 20 charging units

Weight: 20%

Point score:

- 20 points – if the first 20 charging units are delivered within 6 weeks from issuance of the purchase order,
- 15 points – if the first 20 charging units are delivered within 12 weeks from issuance of the purchase order,
- 0 points – if the first 20 charging units are delivered more than 12 weeks after the purchase order is placed.

Total Offer Score = Price Score + Power Output Score + Delivery Time Score

The Contracting Authority shall select the most advantageous offer. The most advantageous offer shall be the one which receives the highest total number of points based on the above criteria.

GreenWay reserves the right to conduct negotiations with the selected tenderer.

Negotiations may concern only the net price and may be conducted solely for the purpose of lowering it in relation to the initial offer.

An offer shall be rejected if it fails to meet any of the mandatory parameters set out in Appendix No. 1, or if its content does not comply with this Request for Quotation.

12. Tender Timeline

The planned timeline for the procedure is as follows:

- **16 April 2025** – Publication of the Request for Quotation

- **from 17 April 2025** – Submission of questions regarding the Request for Quotation or its appendices
- **from 22 April 2025 to 28 April 2025** – Publication of responses and consultations
- **30 April 2025** – Deadline for submission of offers
- **5 May 2025** – Opening and evaluation of offers, communication/clarifications with tenderers
- **7 May 2025** – Announcement of the procedure results
- **9 May 2025** – Signing of the contract

If the selected Contractor withdraws from signing the contract, the Contracting Authority may enter into a contract with the Contractor whose offer received the next highest number of points in a properly conducted tender procedure.

The Contracting Authority shall be entitled to consider that the selected Contractor has withdrawn from signing the contract if the Contractor fails to sign the agreement in accordance with the contract template (Appendix No. 3 to the Request for Quotation) within the specified timeframe, as well as within an additional period set by the Contracting Authority, which shall not be shorter than 3 days.

The contract with the selected supplier shall be concluded for the following duration:

- **until 31 March 2026** for the deliveries;
- **10 years** from the delivery date of the last charger ordered under the contract, with respect to the maintenance of up-to-date and error-free charger firmware;
- **10 years** from the delivery date of the last charger ordered under the contract, with respect to the maintenance of spare parts for the delivered chargers.

13. Communication

All communication (including questions and responses) shall be conducted electronically via the following contact email address: pawel.sierko@greenwaypolska.pl, with a copy to: blazej.siuchninski@greenwaypolska.pl.

14. Personal Data Protection

The information clause on personal data processing (RODO) constitutes **Appendix No. 6** to this Request for Quotation.

15. Appendices

- **Appendix No. 1** – Detailed Description of the Subject of the Contract (Minimum Technical Requirements for Charging Stations)
- **Appendix No. 2** – Offer Form
- **Appendix No. 3** – Contract Template
- **Appendix No. 4** – Declaration of No Grounds for Exclusion
- **Appendix No. 5** – Declaration of Compliance with Participation Criteria
- **Appendix No. 6** – GDPR Information Clause
